The pack contains futuristic tilesets.

It contains a set for exterior tiles and a set for interior. You can do a lot of stuff. Read the description of the product for more info. What you see is almost what you get. Well pictures probably involve parallax mapping. I can't blame marketing department for doing their job right though.

Pros:

Security camera tile.

Futuristic machinery and tiles of good quality.

Cons:

Some tiles do not collaborate well with other DLCs and of course a futuristic DLC does not collaborate well with the original VX Ace content either. Different color contrast and style makes it hard to be combined.

I will recommend this, if you need to limit your game into a futuristic or Sci Fi setting.

Discounts come and go on Steam, so you can get this for a decent price especially on a 75%.. Alright. My view onto this pack?

It's quite neat. You get a handful of new tiles that you may use in projects where you need something .. Well.. Yeah. Futuristic. I am using it in one of my projects where I am drawing out a factory.

### **The Problem**

**When using the grid\ pallet or whatever you want to call it, it seems like the pictures aren't synchronized correctly with the tiles, making it really painful putting them out correctly. I don't understand how the developer of this pack thought it would be good to put out such an expensive pack when you can't use it properly. Of course, you could always use GIMP in order to correct this issue - but that would again take several hours to do. Now, I have only experienced this with some of the sheets. All the tiles might not be screwed.**

**Just... Think twice before buying this pack.. This isn't a Futuristic pack - it is a Futuristic pack with extra Modern Tilesets. Yeah, it's weird. For \$20, I wanted a full game, futuristic icons, futuristic actors, and more.**

**Wait until it goes on sale for ~\$5. At \$20, it is not worth it.. You NEED to bundle this with Scifi V Modern Tilesets DLC. Though it may look nice; it won't work well by itself.**

**Though I would suggest getting this onsale.. This is a decent pack for flushing out something a bit closer to modern up to real SciFi. A great way to bring to life a neighborhood with a secret lab, or something truly futuristic.**

---

Love the look, love the feel, time to make time travel real.. Great tiles, the visual is very nice, but it lacks the dirt, grass and "natural" water tiles... so no caves, beaches, parks or ports on the same map. On the other hand, the best cities, labs and shops.
